USER MANUAL

Micro

Your Travel Buddy

Fresh hypochlorous acid in ten minutes.

From a glass of tap water, a pinch of salt and any USB charger. No cupboard full of bottles.

> Before you start

Everything the Micro needs, you almost certainly already have.

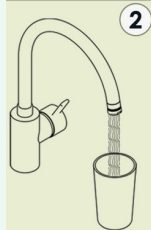

- > 300 ml of tap water – about a tall glass
- > One small spoon of salt, roughly a gram. Plain table or kitchen salt, without additives if you have
- > A millilitre of 5% white vinegar – optional
- > Any USB phone charger or power bank
- > Ten minutes

> Using your Micro

Ten minutes, start to finish.

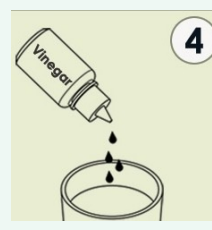

- 1** In the box: the Micro, its lead, a spoon and this manual.

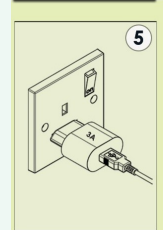

- 2** Fill a cup with 300 ml of tap water.

- 3** Add one small spoon of salt, about a gram.

- 4** Add 1 ml of 5% white vinegar. Optional.

- 5** Plug the Micro into a USB charger.

- 6** Leave it ten minutes – 140 to 180 ppm.

- 7** Use it as a spray, or straight as a rinse.

- 8** Keeps three to seven days, depending on storage.

- 9** Rinse the Micro under the tap afterwards.

- 10** Pop it back in its zip-lock bag.

Please keep in mind

Keep the Micro out of reach of children while it is running.

What the Micro makes is not for drinking.

If any gets in your eyes, rinse them with clean water.

Do not mix what it makes with any other chemical. Mixing it with an acid releases chlorine gas, and with ammonia it forms chloramines.

Keep it out of sunlight and away from heat, and keep the cap on — that is what makes it last the week rather than the day.

Where people use it

- Fruit, vegetables, eggs and seafood
- Drinking water, diluted to 3 ppm free available chlorine
- Face masks, worktops, the shower, the bath, utensils and baby bottles
- Sheets, pillowcases, hotel bedding, tablecloths, shower curtains, towels, bathrobes and the fridge
- The inside of a rental car, and general surface cleaning

➤ The details

Model	MICRO – Your Travel Buddy
What it is	Portable USB hypochlorous acid generator (HOCl / SAEW)
Power	15 W
Charger	3 A / 5 V USB
Size	3.5 × 1.25 × 0.60 inch
Boxed size	6 × 3 × 1.5 inch
Made by	EcoloxTech Inc.

The Micro is a device that makes a hypochlorous acid solution on site. EcoloxTech makes no efficacy claims for the device or for the solution it produces. Where a documented disinfection claim against a named organism is needed, that comes from a registered product used according to its label — HOCl-AS200, EPA Reg. No. 101112-1.
